Governance

Technocery's Governance Program is a distinctive specialty offering for businesses and organizations across all industries seeking to simplify their technological ecosystem, drive digital transformation, and deliver measurable results. Whether you are a chief executive, a senior technologist, or a critical stakeholder seeking to demonstrate value through an intentional experience, we can help guide, direct, and support your company's journey while realizing significant returns on investment.

Overview

Corporations, organizations, and institutions are routinely optimizing their operations by maximizing the productivity of their workforce while simultaneously minimizing expenditures. Information technology is a key driver in scale and central in a team's go-to-market.

Technocery's extensive expertise in service delivery management is anchored upon a detailed scope of work that includes a comprehensive assessment of your organization's digital landscape, a detailed review of your team's technology infrastructure, a strategic brief of business outcomes, and a program plan for governance direction and change management. Depending upon your needs, Technocery can provide counsel and oversight, co-managed support, or even delegated execution of your governance program to achieve successful results.

Classes

Organizations undergoing digital transformation are generally concerned with specific domains of governance classes. Technocery provides specialized management services through our Governance Program across these areas:

- **Data Governance**
  Strategic management of your data assets has never been more critical. Ensuring your data is accurate, available, and secure forms the backbone of our Data Governance domain, securing and turning your data into a valuable asset for decision-making and a

true competitive asset. Focus areas include: <u>data quality management</u>, <u>data security and compliance</u>, <u>data architecture and integration</u>, and <u>data usage and access</u>.

- **Cloud Governance**
  Leveraging remote processing ("compute") and disk space ("storage") is reshaping the business landscape and requires a balanced approach. Technocery guides your organization through the complexities of cloud adoption, ensuring alignment with business goals and regulatory mandates. Focus areas include: <u>cloud strategy and policy development</u>, <u>cost management and optimization</u>, <u>security and compliance in the cloud</u>, and <u>cloud repatriation strategy</u>.

- **Application Governance**
  Ensuring software applications align with business goals is central to delivering value while maintaining performance and compliance standards. Technocery's Application Governance framework orchestrates the lifecycle management of your applications, from development to deployment and maintenance, ensuring they meet your strategic objectives. Focus areas include: <u>application portfolio management</u>, <u>development and deployment standards</u>, and <u>application security and compliance</u>.

- **IT Governance**
  Effective governance of an organization's information technology is essential for ensuring technical investments deliver expected returns. Technocery's IT Governance services provide a framework for decision-making, resource allocation, and performance monitoring, promoting operational excellence and strategic alignment. Focus areas include: <u>strategic alignment</u>, <u>resource management</u>, <u>risk management and compliance</u>.

- **Security Governance**
  In an era where cyber threats loom large, Security Governance is crucial for safeguarding digital assets. Technocery's Security Governance framework strengthens your organization's defense, ensuring comprehensive protection against cyber risks while also enhancing resilience. Focus areas include: <u>cybersecurity policies and standards</u>, <u>incident response and recovery</u>, <u>security awareness and training</u>.
